**Ruminant Meat and Bone Meal Free
09GNS F 35DN****DIRECTIONS**

Feed with hay and/or pasture to make a complete ration for horses. Feed mature horses at the rate of 1/2 to 1 pound per 100 pounds body weight, along with 1 to 1-1/2 pounds of hay or equivalent pasture per 100 pound body weight daily. After observing your horse for a period of time, you may want to increase or decrease the daily feeding of Horse Sweet 10 to keep your horse in the desired condition. The amount required will vary, depending on the quality and amount of hay or pasture consumed.

RECOMMENDATIONS FOR FEEDING HORSES

The recommended feeding rate of Horse Sweet 10 should not be exceeded. Do not feed free-choice. Any feed changes should be made gradually over a period of 7 to 10 days. Changes in the rate of feeding should not exceed one pound per day for each horse. Feed at the regular times—at least twice daily—with three daily feedings preferred. Reduce and/or delay feeding a horse which is hot, excited or showing pain, fever or diarrhea. Let horses feed in a natural position from troughs with large bottoms, placed at normal head height or lower. Have plenty of fresh, clean water available at all times. Maintain an effective control program for internal parasites. Be sure that horses are free of dental problems. Prevent the rapid eating by the horses of any feedstuff. Observe your horses' condition daily. Consult your veterinarian if any problems arise.

CAUTION

Store in a dry, well ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness or death.
