### GODFREY'S PERFORMANCE 10 HORSE FEED FEEDING DIRECTIONS

Godfrey's Performance 10 Horse Feed is textured feed pleasure and performance horses to be fed along with good quality hay and/or pasture. Feed grain at regular intervals and at least twice daily. To maintain desired condition, you may need to increase or decrease feeding rate of Performance 10. Changes should be made gradually and no more than 10% adjustment at one time. Be sure to feed grain by weight. Provide access to salt and fresh clean water at all times. The following feeding directions are guidelines to maintain desired body condition and performance. Feeding rates need to be adjusted according to the horse's condition and training or competition schedule. Split the recommended level into two or more feedings per day.
