**FEEDING DIRECTIONS FOR STRATEGY -
PROFESSIONAL FORMULA GX
WITH HAY OR PASTURE**

Start with the amounts given for the weight and class of horse. After observing the horse for a period of time, the amount fed may be increased or decreased by 10% to obtain the desired body condition and weight. More specific recommendations may also be obtained from a Purina representative.

Always feed a minimum of 1% of body weight of good quality, clean hay or pasture. Inadequate amounts of poor quality hay may lead to colic and other digestive disturbances. Salt should also be fed free-choice to all horses.
